This Guide to Consultants is presented as a service to people interested in agricultural and biological engineering assistance. This listing is not an offer or advertisement to provide engineering services in any state or jurisdiction where the professional engineer or professional engineering firm is not registered/licensed. All information was provided by the listed consultant. The American Society of Agricultural and Biological Engineers (ASABE) assumes no responsibility for the validity of the qualifications listed or the consulting services performed.

Listings for both registered professional engineers and consultants who are not registered engineers are included. In the United States, the registration/licensing of professional engineers is vested in the states/territories. Administration of the relevant laws governing the practice of engineering is assigned to engineering boards. The primary role of these regulatory boards is to protect the life, health, property, and welfare of the public and to ensure that unqualified individuals do not practice engineering. Many other countries also have laws and regulations pertaining to the practice of engineering. When selecting a consultant, it is recommended that any jurisdictional registration/licensing requirements be identified for specific services.

In the following listings, the date after the specialty description is the professional engineer’s initial registration date. The state(s) or country in which the consultant is registered follows the date. The consultant’s availability is given on the next line, including geographic area of service.

Indication of registration in a single state does not imply that a professional engineer cannot be registered in other states. Most state engineering registration laws and rules are patterned after guidelines prepared by the National Council of Examiners for Engineering and Surveying, P.O. Box 1686, Clemson, SC 29633, USA, www.ncees.org. Most states have laws that permit a professional engineer to become registered in other states, either temporarily or permanently, without re-examination. Consideration of the consultant should be on the basis of the consultant’s qualifications and not on where registered, because many consultants can obtain registration in other states or jurisdictions.

Consultants who are not registered professional engineers may have qualifications and expertise in areas other than those requiring professional registrations. Prospective clients should always confirm, through independent sources, the qualifications of all consultants for the services to be performed.
Registered Engineers

Gayle C. Baker, P.E.
Mauer-Stutz, Inc.
3116 N. Dries Lane
Suite 100
Peoria, IL 61604, USA
309-693-7615
cell: 563-380-8720
gcbaker@mstutz.com
www.mstutz.com
Planning and design services for livestock production facilities and soil and water conservation practices. Livestock experience includes beef, dairy, swine, horses and poultry facilities. Experience includes site development, feasibility studies, manure handling/storage/treatment, permitting, nutrient management, equipment/material specification, construction observation, land development, and environmental compliance. Services include design, permitting, crop production, and renewable energy systems to maximize efficiency, profitability, and environmental compliance. Primary services include complete facility design, environmental permitting, and construction management.
Initial date of registration 1990; IA
Available full-time; Domestic

William A. Cook, P.E., L.S.
Neosho Engineering & Technology
20475 Udal Road
Stark, KS 66775, USA
620-754-3500
Boundary surveying, topographic surveying, construction staking, land use planning, preliminary planning for water control structures, real estate development, and community planning.
Initial date of registration 1981; KS
Available full-time; Domestic

Ivan Droessler, P.E.
ISG
Principal + Senior Civil Engineer
1725 North Lake Avenue
Storm Lake, IA 50588, USA
712-732-7745
cell: 712-299-1487
ivan.droessler@ISGInc.com
ISGInc.com
ISG specializes in agricultural drainage, Edge of Field practices, wastewater, waste management and facilities. Our innovative drainage projects serve as industry models. Through well-engineered and designed systems and facilities, ISG杆菌 partners experience expedited environmental approvals, enhanced production, minimized maintenance and repair costs, and a reduced environmental impact.
Initial date of registration 1990; IA
Available full-time; Domestic

Ivan Droessler, P.E.
ISG
Project Manager + Agricultural Engineer
1725 North Lake Avenue
Storm Lake, IA 50588, USA
712-732-7745
cell: 712-299-4889
Brian.Blimme@ISGInc.com
ISGInc.com
ISG offers multidisciplinary agricultural drainage expertise from three Iowa offices, helping industry partners balance crop production, water quality, and environmental compliance. Expertise includes the design and construction of edge of field practices including bioreactors, saturated buffers, treatment wetlands, as well as water control structures, alternative tile inlets, surge basins, and more.
Initial date of registration 2014; IA
Available full-time; Domestic

Consultation on agricultural research/ experiment stations, commercial and private facilities housing livestock and poultry or storing grain and seed. Services include designs, plans, and specifications for the general, structural, mechanical, and electrical portions of the projects, including site development, utilities, and waste handling.

Initial date of registration 1977; IA, OK, IL, KS, OH, ID, CO, MO, MN, MS, WI, NC, KY, NE, PA, IN, MI, NJ, AR, MD, TN, AL, VA, CA, NY, WA, WY
Available full-time; Domestic and International
Other Consultants

**Nellie J. Brown, M.S., C.I.H.**
Director of Workplace Health & Safety Programs
Lead Programs Manager
Cornell University, ILR School
617 Main Street, Suite 300
Buffalo, NY 14203, USA
716-852-1444 ext 111
njb7@cornell.edu

Nellie Brown is a certified industrial hygienist, providing health and safety training and technical assistance. She developed a process failure and hazard assessment protocol for anaerobic digesters used for processing manure and generating electricity on dairy farms. Nellie serves on an ASABE committee developing a standard on manure pit ventilation.

Available part-time

**Industrial & Environmental Concepts Covers & Liners**
IEC
21390 Heywood Avenue
Lakeville, MN 55044, USA
952-829-0731
anderson@ieccovers.com
www.ieccovers.com

IEC is a turn-key provider of covers & liners. We design, fabricate & install covers & liners on wastewater basins for large dairy & hog producers in addition to industrial and municipal projects. Anaerobic covers are our specialty. We work closely with engineers & clients using tanks and lagoons for projects involving energy, biosolids, rainwater or process treatment.

Your personal/company consultant business card could appear here. For information on rates ($95 and up) visit www.asabe.org/GuideToConsultantsInfo or contact Sandy Rutter, 269-932-7004, rutter@asabe.org.
WHAT A CONSULTING ENGINEER CAN DO FOR YOU

Because of their broad educational background, consulting agricultural engineers are a source of information on a wide variety of topics and can provide help with diverse technical problems. The design and management services agricultural engineers provide can be invaluable to small businesses without their own engineering departments, to agricultural producers and similar enterprises, and to large businesses or governmental agencies that want to supplement their in-house engineering departments. Consultants also can provide service to lending institutions, law firms, local units of government and planning boards, or to individuals that need expert witnesses or technical analysis.

What is a Consulting Engineer?
A consulting engineer is an independent contractor retained to work on a project-by-project basis. A consulting engineer may work alone or as a member of a consulting firm. Consulting engineers can provide a high level of technical expertise, direct personal service, and highly technical advice. Many consulting engineers are licensed professional engineers in their state of residence and must qualify to obtain licensure in other states where they practice or provide services.

What Expertise Does a Consulting Agricultural Engineer Have?
Agricultural engineers have a diverse educational background that makes them knowledgeable about many subjects; additionally, they usually focus their expertise on one of the following areas:

- Applied Sciences & Engineering
- Machinery Systems
- Education, Outreach & Professional Development
- Natural Resources & Environmental Systems
- Energy Systems

- Plant, Animal & Facility Systems
- Ergonomics Safety & Health
- Processing Systems
- Information Technology, Sensors & Control Systems

For more information, please visit www.asabe.org/GuideToConsultantsInfo

ADVERTISE IN THE GUIDE TO CONSULTANTS

Inexpensive: $95 (current listing rate—other options available)

Easy: Contact Sandy Rutter at 269-932-7004 or email GuideToConsultants@asabe.org or return the form on www.asabe.org/GuideToConsultantsInfo

This stand-alone print directory is mailed along with our May/June issue of Resource magazine. It is also posted on the ASABE website for approximately 12 months and distributed when ASABE receives queries regarding consultants. It may also be distributed at other events. Search Google for “agricultural engineering consultant” or “biological engineering consultant” and see “Why Hire A Consultant”.

CODE OF ETHICS OF ENGINEERS

The Fundamental Code of Principles
Engineers uphold and advance the integrity, honor and dignity of the engineering profession by:
I. using their knowledge and skill for the enhancement of human welfare;
II. being honest and impartial, and serving with fidelity the public, their employers and clients;
III. striving to increase the competence and prestige of the engineering profession; and
IV. supporting the professional and technical societies of their disciplines.

The Fundamental Canons
1. Engineers shall hold paramount the safety, health and welfare of the public in the performance of their professional duties.
2. Engineers shall perform services only in the areas of their competence.
3. Engineers shall issue public statements only in an objective and truthful manner.
4. Engineers shall act in professional matters for each employer or client as faithful agents or trustees, and shall avoid conflicts of interest.
5. Engineers shall build their professional reputation on the merit of their services and shall not compete unfairly with others.
6. Engineers shall act in such a manner as to uphold and enhance the honor, integrity and dignity of the profession.
7. Engineers shall continue their professional development throughout their careers and shall provide opportunities for the professional development of those engineers under their supervision.
