

# NUMERICAL INDEX TO ASABE STANDARDS, ENGINEERING PRACTICES, AND DATA

**ASABE Notation:**

The letters S, EP, and D designate the document classifications of Standard, Engineering Practice, and Data. The letter, T, after the numeric designation indicates Tentative Standard classification. The base 3-digit number has no significance. The digits following the decimal identify a specific technical revision of the original document. The month-year designation represents the most recent action on the document (adoption, revision, or reaffirmation). If the year is indicated with four digits it represents the adoption or last revision of the document. Parentheses following the four digit year indicate the year the document was last reaffirmed.

<b>Examples:</b>	S318.14 SEP99	S = standard	.14 = fourteenth technical revision
	D271.2 APR1979 (R2005)	318 = base number	SEP99 = last revision or reaffirmation
		D = data	.2 = second technical revision
		279 = base number	APR1979 = adoption or last revision (R2005) = last reaffirmation

NOTE: ASABE Standards, Engineering Practices, and Data are informational and advisory only. Their use by anyone engaged in industry or trade is entirely voluntary. The ASABE assumes no responsibility for results attributable to the application of these ASABE Standards, Engineering Practices, and Data. Conformity does not ensure compliance with applicable ordinances, laws and regulations. Prospective users are responsible for protecting themselves against liability for infringement of patents.
