Sunflower offers the best of both worlds in the Model 9530 grain drill: capacity and versatility. Equipped with a new divided hopper, the 9530 provides the operator with the ability to apply fertilizer during planting or convert the hopper to an all-seed mode for up to 5.3 m<sup>3</sup> (150 bushels) capacity [12-m (40-ft) model], which translates into more time in the field and less time filling. The 0.1 m<sup>3</sup>/0.3 m (3.75 bushel/ft) hoppers are divided in a 60 percent seed/40 percent fertilizer ratio and feature a single shoot delivery to the all-purpose row unit. Choose from two different models in 9- and 12-m (30- and 40-ft) drilling widths and a choice of 19- or 25-cm (7.5- or 10-in.) row spacings. All four configurations feature the Sunflower Heads-Up opener assembly, which ensures superior seed placement, as well as a staggered three-section, forward-fold design that promises a new level of flexibility in all field conditions and transports at less than 4-m (14-ft) wide.
