The YP2425 Yield-Pro Planter is a 18-m (60 ft) wide planting tool that brings new productivity to row-crop farmers. It allows narrow spacings of 38 cm (15 in.), twin-row 0.8 m (30 in.), and 0.5 m (20 in.) as well as 0.8 m (30 in.) single rows on the large 18 m (60 ft) planting width. It further offers central seed location for easier filling, capacity up to 6 m³ (164 bushels) on board, and the exclusive option to plant directly out of standard seed-supplier seed box containers. The row-spacing options allow growers to enjoy proven yield benefits up to 2.4 m³/ha (33.5 bushels/acre) while covering 50 percent more acreage with each pass. The central seed system capacity allows planting 36 to 64 percent more acres before refilling, providing greater productivity. The exclusive floating tongue offers excellent terrain following for uniform planting depth.
