## *News Release*

**FOR IMMEDIATE RELEASE**

October 20, 2022

### **ASABE TO REVISE AGRICULTURAL CAB ENVIRONMENT STANDARD**

ST JOSEPH, MICHIGAN— The American Society of Agricultural and Biological Engineers (ASABE) is revising the terminology and overview document in its series of standards for agricultural cab air quality.

ASABE standards are subject to periodic review to ensure accuracy and also relevance to current practices and technology. In their review of ANSI/ASABE S613-1, Tractors and Self-Propelled Machinery for Agriculture — Air Quality Systems for Cabs — Part 1: Terminology and Overview, reviewers identified areas to revise which would upgrade the standard to meet current practices and references. Editorial changes will also be done to clarify and improve existing language and terminology.

ASABE is recognized worldwide as a standards developing organization for food, agricultural, and biological systems, with more than 280 standards currently in publication. Conformance to ASABE standards is voluntary, except where required by state, provincial, or other governmental requirements, and the documents are developed by consensus in accordance with procedures approved by the American National Standards Institute. For information on this or any other ASABE standard, contact Scott Cedarquist at 269-932-7031, [cedarq@asabe.org](mailto:cedarq@asabe.org). A current listing of all ASABE standards projects can be found on the ASABE web site at [www.asabe.org/projects](http://www.asabe.org/projects).

ASABE is an international scientific and educational organization dedicated to the advancement of engineering applicable to agricultural, food, and biological systems. Further information on the Society can be obtained by contacting ASABE at (269) 429-0300, emailing [hq@asabe.org](mailto:hq@asabe.org) or visiting [www.asabe.org/](http://www.asabe.org/).
