ASABE Notation:
The letters S, EP, and D designate the document classification of Standard, Engineering Practice, and Data. The base 3-digit number has no significance. The digits following the decimal identify a specific technical revision of the original document. The month-year designation represents the most recent action, adoption or revision, on the document. Parentheses following the month-year indicate the year the document was last reaffirmed.

D271.2 APR1979 (R2014) D = data
2 = second revision
(R2014) = last reaffirmation
271 = base number
APR1979 = adoption or last revision

ISO Adaptions:
ASABE ISO adaptions are designated by AD (Adoption with deviations) or ISO (identical adoption). The base number is the ISO document number. The 4-digit number following the ISO number is the year the document was approved by ISO. The month-year designation represents the most recent ASABE adoption or revision of the document. Parentheses following the month-year indicate the year the document was reaffirmed.

9191 = ISO document adopted
1990 = version of ISO adopted
2001 = adoption or last revision
(R2017) = last reaffirmation
